Education

Simon Fraser University — Burnaby, BC
Bachelor of Computer Science, Minor in Statistics — *Expected Dec 2027*

Experience

Software Engineering Co-op — Sep 2026 – Present
EnerSys — *Burnaby, BC*

- Designed a multi-step onboarding wizard in **Figma** for the **XM Edge** app, which monitors power systems over **Bluetooth (BLE)** for **10,000+ customers** in **100 countries**, and am building it in **React Native**
- Fixed **25+ bugs** across the app, testing in **Android Studio** and merging fixes through **Azure DevOps** pull requests, including **7** in my first **2 weeks**
- Prepared the **Google Play** release, now in **internal testing** with EnerSys users, and audited the app's **encryption**, **storage**, and **HTTPS** use for legal's Data Processing Addendum
- Turned tech discussions into **user stories** and Azure DevOps tasks, helping engineers map dependencies
- Reviewed alarm and monitoring workflows in a **network management system (NMS)** for third-party devices

Secretary and Website Committee Member — May 2026 – Present
SFU Women in Computing Science (WiCS) and Try/Catch — *Burnaby, BC*

- Keep a **16-person exec team** aligned across **13 portfolios** with weekly updates, and maintain the WiCS website
- Co-built the site for **Try/Catch**, an outreach conference for high school women and non-binary students, with **97 sign-ups** and **5 workshops**
- Built a **scavenger-hunt game** sending students to sponsor booths, with **Google Apps Script** routing entries into **Sheets** and photos into **Drive**

Projects

Ainori: Real-Time Carpool Matching for SFU — Oct 2026
Go, gRPC, Redis Streams, H3, PostgreSQL, OpenTelemetry, React, deck.gl — GitHub

- Built a real-time carpool matcher in **Go** for SFU commuters, using Uber's **H3** hexagon index to find nearby drivers and filter by seats, class start time, and a women/non-binary-only safety option
- Split it into **3 services** linked by **gRPC** and **Redis Streams** with at-least-once delivery, crash recovery, and an atomic **Lua** seat claim that prevents double-booking, verified by a **50-goroutine race test**
- Wrote a load-testing CLI that simulates **200 drivers** and **600 riders** on **7 real routes**, measuring **31.5 ms p99** match latency at **25 req/s** with **OpenTelemetry** traces across every service
- Streamed matches over **WebSocket** to a live **deck.gl** map of demand hexagons, drivers, and gas cost splits

LuminestBC: Live Shelter Bed Finder — Oct 2026
React, TypeScript, Flask-SocketIO, PostgreSQL, Twilio, Figma — Live | GitHub

- Led the **React** frontend of a **live shelter bed map** for outreach workers, built by **4** in **24 hours** at StormHacks
- Connected the map to a **Flask-SocketIO** and **PostgreSQL** backend so bed counts update in **real time**

ResumeRadar: AI Resume-to-Job Fit Analyzer — May 2026
React, TypeScript, AWS Lambda, DynamoDB, Cognito, Amazon Bedrock — Live | GitHub

- Deployed a serverless app on **6 AWS services** that scores resume-to-job fit **0 to 100**, with **Bedrock** explaining the gaps
- Added an adaptive **AI mock interview** mode with **4 Lambda functions**, parsing resumes **in memory only**

Canadian Tech Internship Alerts — Aug 2026
Python, Twilio, Discord

- Polls **Workday**, **Greenhouse**, **Lever**, and **SmartRecruiters** APIs every few hours and texts new internships via **Twilio**

Technical Skills

Languages: Go, Python, Java, TypeScript, JavaScript, C++, C, C#, SQL, HTML, CSS
Frameworks: React, React Native (Expo), Node.js, Express, Flask, FastAPI, ASP.NET Core, deck.gl
Infrastructure and Data: gRPC, Redis, PostgreSQL, Docker, OpenTelemetry, AWS (Lambda, DynamoDB, Bedrock)
Tools and AI: Git, Azure DevOps, GitHub Actions, Android Studio, Figma, Apps Script, pytest, Claude, Codex
